MAXIGROUT
For Walls and Floors
POLYMER MODIFIED FLEXIBLE GROUT TO BE MIXED WITH WATER

NSFPlus | BSI REGISTERED | UKAS QUALITY MANAGEMENT 003

Certificate Number FM29138

DESCRIPTION:

Polymer modified flexible grout suitable for joints between tiles up to 20mm.

When cured it is water resistant and suitable for internal and external use.

Suitable for use in kitchens and bathrooms.

Suitable for use in wet areas including swimming pools and showers.

Suitable for both Wall and Floor tiles

Suitable for grouting a variety of tiles such as ceramics, slate, quarries, porcelain, limestone, marble, terrazzo, and mosaics subject to slight movement or vibration on a variety of surfaces.

WARNING:

Coloured grouts can cause staining to certain tiles. Apply a suitable tile protector.
Avoid covering tiles with grout and work into the joints contacting as little of the tile as possible.

You are advised to check the grout on a spare tile before grouting commences.

Minimum joint width 2mm.

Can cause scratching to soft glazed or vulnerable wall tiles.

PREPARATION:

Ensure tiles are firmly fixed before grouting. Joints must be clean.

UNDERFLOOR HEATING:

Suitable for under floor heating. Allow 48 hours for the grout to set before introducing heat gradually.

TILE GROUTING:

Add grout powder to clean cold tap water in a clean container and mix to a smooth slightly stiff consistency either by hand or using a mechanical mixing paddle.
Addition rate 4 parts by weight of powder to 1 part water.
Do not use excess water during mixing or washing down as this can lead to staining or efflorescence on the surface of the grout. Mix only sufficient that can be used within 30 minutes. Product that has started to set must be discarded. Work the grout into the joints to ensure they are completely filled. Clean surplus grout from the tiles and joints as soon as possible as set grout will be difficult to remove later. Polish the surface with a soft dry cloth.

FLOOR MAINTENANCE:

The tiles should be maintained with Granfix EasiCare products.

PACK SIZES: 1.5Kg, 3.5Kg, 5Kg and 10Kg

COLOUR: White, Ivory, Beige, Black, Sandstone Grey and Terracotta

COVERAGE: Per 5Kg Bag

		JOINT WIDTH (mm)		
		3	5	10
TILE SIZE (mm)	Mosaic: 24 x 24 x 10	1.2m²	0.8m²	0.4m²
	150 x 150 x 8	10m²	6m²	3m²
	330 x 330 x 10	16m²	10m²	5m²
	400 x 400 x 10	20m²	13m²	6.5m²
	600 x 600 x 10	30m²	20m²	10m²

STORAGE: Store unopened in cool dry conditions. Keep clear of the ground.

SHELF LIFE: Stored correctly, this product has a shelf life of 12 months from the date shown on the packaging.

TECHNICAL NOTES:

All work must be carried out in accordance with British Standard Code of Practice for floor and wall tiling BS5385.
Maxigrout (Grey, Black, Sandstone and Terracotta) contains a reducing agent to control the level of Chromium VI. When stored correctly the activity of the reducing agent will be maintained and the product when mixed with water will produce no more than (0.0002%) 2ppm Chromium VI of the total weight of the dry cement. Use of the product after the end of the declared shelf life may increase the risk of an allergic reaction.

TECHNICAL DATA:

Suitable for under floor heating:	Yes
Bulk density of powder:	1.2Kg per Litre
Weight of wet mortar:	1.6Kg per Litre
Joint Sizes:	Up to 20mm

*Note: All times refer to site conditions of 20ºC. These times will be increased at lower temperatures and reduced at elevated temperatures.

Application temperature:	Between 5°C and 30°C
Service Conditions:	-20°C to +50°C
Pot Life:	30 mins at 20°C
Setting Time:	24 hours*
Light Foot Traffic:	3 hours*
Underfloor Heating:	Allow 48 hours before introducing heat gradually
Contact with Water:	3 Days
