

Shower Seat Installation Manual

This instruction is used on code:10017

- * For safety, please read this installation manual carefully before installation of this product
- * Correct installation must be carried out for full function of the product
- * Please retain this installation manual for future reference

Installation Guide:

1. The shower seat (5) must be installed securely to the wall before use
2. Drill the wall (if a solid wall) using an 8mm drill bit, to a depth of 73mm (Excluding tile depth)
3. If drilling into anything other than a solid wall, suitable fittings must be used (not provided)
4. Check for pipes and wires before drilling
5. After drilling insert the wall plugs (1)
6. Place the shower seat (5) against the wall and secure using screws provided (3)
7. Finally fit screw covers (4) onto screws (3)
