

single part flexible

Lead in questions

- Do you need a highly flexible adhesive?
- Do you need a cement-based adhesive that is water and frost-resistant?
- Do you need an adhesive with a prolonged pot life?

Features & Benefits

Feature 1: Highly Flexible

- Will accommodate limited movement and vibration areas

Benefit: Suitable for installations subject to limited movement vibration, eg underfloor heating

Feature 2: Non-slip with enhanced adhesion

- Instant grab, battens not always necessary
- Enhanced adhesion to fully vitrified/porcelain tiles and low porosity substrates

Benefit: Reduced time to tile; saves time

Feature 3: Highly water/frost-resistant

- Can be used on most interior and exterior walls and floors, domestic and commercial – including wet areas.
- Can be used in showers, swimming pools and total immersion areas

Benefit: Simplicity; versatile product that can be used in a number of environments

When should I sell this?

BAL single part flexible adhesive should be used when a water / frost-resistant cement based tile adhesive is required for walls & floors. Suitable for most tile types, including large format for walls.

Ideal for warmer environments due to pot life and setting times of product.

Not suitable for porous natural stone or any natural stone that could be affected by moisture.
