

# BAL Best Value single part fastflex

## Features & Benefits

**Feature 1: Price per mixed litre reduced by approx 33% on the grey and approx. 60% on the white.**

- Actual literage of mixed adhesive is much greater than 2-part system and provides more m<sup>2</sup> of tiling for the same price.

**Benefit: Fixers have a superior BAL product for a much lower cost per m<sup>2</sup> making it best value.**

**Feature 2: 1 part mix replacing 2-part system.**

- Maintains exact same spec & properties as BAL 2-Part Fast Flex, but now single powder mixed with water.

**Benefit: Easier to use as always enough water on-site – no need for extras such as liquids.**

**Feature 3: Sound reduction properties.**

- Unique formulation also helps provide sound reduction in tiling (part of the Part E building regs).

**Benefit: Can secure more work in Multi-Home Developments and Commercial Buildings**

**Feature 4: Elastomeric: rubber-like flexibility.**

- Single Part Fastflex exceeds even the highest test for flexibility (S2 requirement) by a factor of three!

**Benefit: Fixes any tile to the most difficult substrates, where movement and vibration are expected.**

## When should I sell this?

Use this on when tiling onto substrates where vibration and movement are expected – i.e. tiling on timber floor boards and sheets.

Instead of:

- BAL 2-part Fast Flex
- Dunlop 2-part Rapidset Flex
- Profix Tile on Wood Rapid
- Mapei Keraquick + Latex Plus
- Weber.set WF21

## ...PLUS enjoy the benefit of BAL
