SAFETY

- This is for domestic, indoor use only.
- If there is a “Minimum Distance” Label, please do not allow Flammable Materials to rest within that distance from the unit.
- This product may contain delicate parts – be careful during handling and maintenance to avoid breakage.
- Any modification to the fitting will invalidate the warranty and may render the product unsafe.
- This product is IP44 rated, and no part of the installation is allowed to be within bathroom Zones 0 or 1. Installation is permitted within Zone 2.
- Before commencing installation, ensure that there are no pipes or wires located behind the wall that may be damaged during drilling.
- Ensure that the hanging location has been decided upon and marked clearly to avoid unwanted damage to the wall due to incorrect positioning.
- Check that the mirror is not damaged prior to installation.
- Once installed, a bead of silicone can be applied between the mirror and the wall along the top and sides of the unit. Do not seal the bottom edge, as this may trap water behind the mirror and cause damage.
- Take care of unpacking, and do not use a sharp blade to open it, as this may damage the mirror and void your warranty.
- The light source of this luminaire is not replaceable; when the light source reaches its end of life, the entire unit shall be replaced.
- Use only high-quality alkaline AA batteries.
- Do not expose batteries or the product to excessive heat (e.g. direct sunlight or near radiators).
- Do not mix old and new batteries.
- Do not mix different battery types or brands.
- Insert batteries with the correct polarity.
- Do not recharge non-rechargeable batteries.
- Do not disassemble or dispose of batteries in fire.
- Ensure battery compartment is fully closed before use.
- Remove batteries if the product will not be used for a long time.
- Keep batteries out of reach of children.
- Do not short-circuit battery terminals.
- Dispose of used batteries according to local regulations.

BATHROOM ZONES

Zone 0:	The interior of the bathtub or shower basin.
Zone 1:	The area around the bathtub or shower basin up to a height of 2.25m above the floor
Zone 2:	The area stretching to 0.6m outside the bath or shower and above the bath or shower if over 2.25m

INSTALLATION DIMENSIONS

APOLLOB800

APOLLOB1000

INSTALLATION

IMPORTANT: Before commencing installation, ensure that there are no pipes or wires located behind the wall that you will be drilling into and check the item is functional with inserted batteries (not supplied).

The product dimensions are on the last page; alternatively, you can use the two hanging hooks on the back of the mirror as a guide.

- Ensure that the hanging location has been decided upon and marked clearly to avoid unwanted damage to the wall due to incorrect positioning.
- Check that the mirror is not damaged prior to installation.
- Take care of unpacking, and do not use a sharp blade to open it, as this may damage the mirror and void your warranty.

Follow the instructions in the “REPLACING THE BATTERIES” section and test the mirror turns on and off. If it does not, please contact customer services.

1. Mark the drill hole spots on your wall using a spirit level to ensure they are level.
2. Drill the holes in the wall with an 8mm drill bit and insert two wall plugs.
3. Insert the screws, leaving them protruding by 3mm. It is recommended that these levels be checked again with the spirit level.
4. Hang the mirror on the screws vertically or horizontally, depending on preference.

OPERATION

This mirror has a rocker switch located near the base. Press the side marked “I” to turn on the lights, and the side marked “O” to turn them off.

CLEANING AND MAINTENANCE

Never use products containing bleach or abrasive cleaners, as this will have a detrimental effect on the appearance and lifespan of the product.

Use a clean microfibre cloth to clean the mirror.

REPLACING THE BATTERIES (NOT SUPPLIED)

1. Unscrew the battery compartment from the back of the mirror and carefully pull it out.

2. On top of the battery compartment is a cover secured by a screw. Remove this screw to open the cover.

3. Insert 8 × AA 1.5V batteries (not included) into the battery compartment, ensuring correct polarity. Reattach the cover and tighten the screw.
4. Slide the battery compartment back into place at the rear of the mirror. Tighten the screws securely.

5. Press the side marked “|” to turn on the lights and test functionality.

NOTE: For optimal performance, we recommend using high-capacity alkaline batteries. Using lower-capacity batteries may reduce brightness and shorten battery life.

TECHNICAL SPECIFICATION

Model	APOLLOB800	APOLLOB1000
WxHxD (mm)	800x500x44	1000x600x44
Net Weight (Kg)	5	7.4
