# Maintenance/ Care and Cleaning Instruction

#### **Maintenance and Cleaning Instructions**

The finishes of our products are durable. To keep our products in good condition, the end users are required to regularly maintain and clean all the surfaces based on the following guidelines:

- Warm water or mild soapy water should be used to remove system debris and limescale.
- After cleaning, all soapy water should be removed by water and polished with a clean, soft and dry cloth.
- No abrasive cleaning agents or materials should be used.
- No corrosive cleaning agents should be used, which will cause corrosion.
- More care should be taken in hard-water areas to ensure all the surfaces are regularly cleaned.
- Failure to do so will invalidate the product warranty.

#### **Care Instructions**

Please be careful when installing, using, cleaning and maintaining this product. Any defects or damages like peeling problem at this product due to the following reasons is not covered by the product warranty:

- incorrect installation.
- accidental or wilful misuse.
- inappropriate cleaning products.
- inadequate maintenance.
- chemical damage caused by system debris and build-up of limescale (any soapy water left on the surface of the product and not cleaned regular will affect the finish of the product.)
- physical damages like scratches.

- water quality i.e. rusting water from the pipework need to be fully flushed out after use or water pressure issues.

## **Assembly Instructions**

### Installation Steps

- 1. Indentify all components are present prior to installation
- 2. Flush pipes to get rid of any debris blocked in pipes before installation
- 3. Screwing body(C), ensure washers(Items D and E) are in place
- 4. Screw lock nut (B) to Overflow body (C) ,then screw Overflow Cover (A) to lock nut (B)
- 5. Screwing waste body (J), ensure washers (Items H and I) and Flange (G) are in place
- Fill the bath with water and check all joints to ensure there are no leaks. This is best done in stages starting with a small amout of water before fully filling the bath
- 7. Once fitting has been completed, carefully clean all plated surfaces. The finished surface on this product are hard and durable and should be cleaned on a regular basis to maintain their appearance.

They should only be cleaned with warm soapy water and then wiped with a dry cloth

Bath tub

A. Overflow cover
B. Lock nut
C. Overflow body
D. Flat washer-lock nut
E. Flat washer overflow
F. Cover
G. Flange
H. Washer
I. Washer
J. Waste Body

Once assembled, fill the bath with water, check for leaks.
