- 5.Spare parts (Allen key and Screw)
- 6.Wall screws and wall plugs

Parts / Diagrams

Tools required

Installation requires a screwdriver, adjustable wrench, adjustable pliers, and drill, PTFE sealing tape, pencil, silicone.

Installation

1. Select the position for the shower valve and offer the shower valve to the wall, mark the 4 fixing points at the top and bottom with a suitable pencil.

Remove the shower valve from the wall, drill the holes to a suitable depth for the wall plugs and secure with supplied screws.

The valve must be set into the wall by 60-70mm(see dimension page).

2. Connect hot supply to left inlet of the valve and cold supply to right inlet.

Connect the top and bottom outlet to the shower options.

3. Turn on the water supply and check for leaks before fitting the back plate.

Use silicone to seal the back plate.

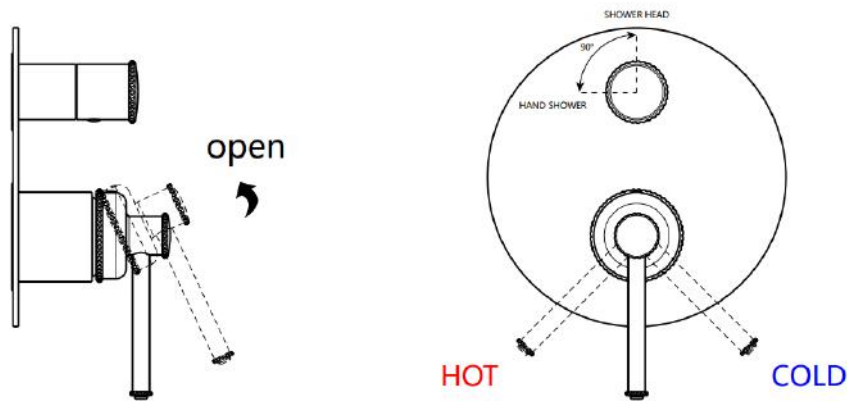

4. Carefully slide the diverter handle onto the shower valve. Secure the handle by tightening the grub screw using the supplied Allen key.

Carefully slide the control handle onto the shower valve. Fix the handle by tightening the grub screw with the supplied Allen key.

Operation

Troubleshooting

Fail	Cause	Solution
Insufficient water flow	Incoming water pressure is low.	Check with your local water supply pressure.
	Mixer cartridge inlet is dirty or blocked.	Remove and clean the cartridge.
Water dripping after closed	Loose mixer cartridge.	Remove, check and clean the mixer cartridge.
	Damaged mixer cartridge.	Replace the cartridge with a new one.
Diverter incorrectly	Diverter cartridge clogged.	Clean diverter cartridge-Soak in vinegar 30 minutes. Replace new diverter cartridge.

Maintenance

Mixer cartridge

- 1) Remove the handle (A&B) ,dome (C) and locking nut (D).
- 2) Pull out the mixer cartridge (E).
- 3) Wash the cartridge with clean running water, dry and lightly grease the seals(only use silicone grease).
- 4) Put back the cartridge, then tighten the locking nut.
- 5) Install the dome and handle. Test and commission.

Diverter cartridge

- 1) Remove the diverter handle (A&B) and mixer handle(C&D).
- 2) Take out the back plate (E) and unscrew out the diverter sleeve.
- 3) Pull out diverter cartridge .Wash the cartridge with clean running water, dry and lightly grease the seals(only use silicone grease).
- 4) Reinstall the product by reversing the assembly steps.

Cleaning

Clean the product surface with a soft cloth and a mild detergent or citric acid solution. The use of any rough materials, as well as corrosive or abrasive cleaning agents, is not recommended as they may cause damage to the coating.
