10. Spare parts (Allen key and screw for shower mixer)
11. Spirit level

Screws and plugs supplied are for masonry only, for any other structure a suitable plug and screw must be used.

Parts / Diagrams

Tools required

- Spanner ☐
- Hammer ☐
- Drill and bit ☐
- PTFE seal tape ☐
- Screw driver

Installation

 Step 1 Apply tape to connection couplings and screw into wall fittings (Not supplied). Adjust the couplings to level position using the provided spirit level.	 Step 2 Losen the allen keys from the shower mixer, install the shower mixer onto the connection couplings and tighten screws.
 Step 3 Install the riser in the shower mixer. Turn left to tighten up.	 Step 4 Install the wall bracket on the shower arm.
 Step 5 Make sure the riser is level, mark the position of the screw holes.	 Step 6 Remove the riser and the wall bracket.

Step 7

Confirm the position of the wall bracket, drill a hole in the wall for the wall bracket. Use the allen screw to fix the wall bracket onto the wall.

Step 8

Install the slider rail on the valve body. Adjust shower rail to appropriate height, tighten the lever on the rail once located in required position.

Step 9

Install the shower rain head.

Step 10

Place the hose washer in the short hose end connection. Connect this end of the hose to the faucet. Place the screen washer in the long hose end connection. Install the handshower on this end of the hose. Rest the handshower in the holder.

Operation

- Push the individual button to activate the shower head or hand shower.
- Rotate the bath spout forward to activate water flow, and backward to shut off.

- The right circular handle maintains temperature, while the left circular handle regulates water flow.

Troubleshooting

Description	Cause	Solution
1. Insufficient water of the shower head and hand shower	1a. Debris or limescale build up or blockage in supply	1. Remove and clean, rubbing the nozzles with a soft brush
		2. Check all pipes and inlet for blockages
2. Temperature regulation failure	2a. Pressures not balanced and cold overriding hot	2a. Increase hot water pressure or reduce cold, but maintain minimum pressure for mixer
	2b. Hot and cold supplies are reversed	2b. Change connections
	2c. Thermostatic cartridge clogged	2c. Remove the thermostatic cartridge, soak it in vinegar for a few hours and then rinse it with clean water and reseal in shower valve
3. Dripping continually after closure	3a. Debris in the shower valve	3a. Remove the diverter cartridge from housing, wash thoroughly with clean water and reseal in shower valve
4. Mixer shuts down during showering	4a. Safety shut off, cold water failure	4a. Check cold water supply is on and not blocked

Maintenance

Replace the thermostatic cartridge

Please turn off the water supply and turn the mixer on ,to allow water to drain from the mixer body before replacement.

Loose the grub screw by Allen key and then take out the handle (B).

Remove the positioning ring (C), loose the grub screw (A) and take out the thermostatic cartridge (D). Clean the cartridge or replace it with anew one.

Install the thermostatic cartridge by reverse steps. Take note the red marking on the thermostatic cartridge, should keep align with the marking on positioning ring,and positioning rod in the handle.

Replace the diverter cartridge

Take out the button cover (E) by hand ,loosen the screw (F) by screwdriver and remove the plastic plate(G).

Gently remove the cartridge retainer (H) by circlip plier and use the Allen Socket Wrench to disassemble the diverter cartridge (I) .

Clean the cartridge or replace it with a new one. Install the diverter cartridge by reverse steps.

Cleaning

- Clean the product surface with a soft cloth and a mild detergent or citric acid solution. The use of any rough materials, as well as corrosive or abrasive cleaning agents, is not recommended as they may cause damage to the coating.
