

Installation

1. Insert the screws on the hinge base and then into the holes on the pan.

2. Tighten the screws to fix the hinge bases (but not fully tightened at this stage)

3. Adjust the hinges to a proper distance and place the metal cover onto the hinges

4. Try the seat on the hinges, re-adjust it if the distance does not match until it fits. Take off the metal cover and tighten the screws

5. Put the hinge cover back. Push the seat cover into the hinge base. Finish

6. Press the button to remove the seat cover for cleaning

Cleaning:

No harsh cleaning chemicals or abrasive materials can be used on any part of the seat or fittings

Wipe down using a clean damp cloth
