Trinity Premium Sliding Door
Instructions

*** Image for installation purpose only

Please retain this manual after installation for future reference and maintenance.

Product must be installed in compliance with relevant Water by installing the tray and tile down onto this.

Importance

*** Handle with care, impact can damage both the glass and frame
*** Check for pipes and wires prior to installation
*** Use of safety equipment is advised
*** Two people may be required for part of the installation
*** If installing on a tray, follow correct method of installation by installing the tray and tile down onto this.

### TOOLS REQUIRED (not supplied)

- Spirit Level
- Wrench
- Tape
- Marking Pencil
- Silicone Gun
- Hammer
- Drill Bit
- Drill
- Screwdriver

1400 enclosure - 1345mm
1600 enclosure - 1545mm
1700 enclosure - 1645mm
Installation Guide

Step 1
Place the fixed panel wall profile 5mm in from the front edge of the tray and connector profile 25mm in from the front edge of the tray, using a spirit level to ensure the profiles are vertical.
Mark the drill holes through the inside of the wall profiles, carry out the same for both wall profiles.

![Diagram of installation guide step 1](image1)

Step 2
2.1 Once the holes are marked on the wall, remove the wall profiles and drill the holes using Φ6mm bit.
2.2 Place the plugs (14) and insert them into wall.

![Diagram of installation guide step 2](image2)
Step 3

3.1 Place the wall profile (01) back onto the wall and using screwdriver to fix the screws (16)
3.2 Push the fixed glass panel (03) into the wall profile (01)

Step 4

Place the rail (17) on the fixed glass panel (03) and line up the holes on the panel and rail

4.1 Mark around the metal fixture (15) and remove the rail, remark the hole position through the metal fixture to the wall
4.2 Drill the hole and fix the plug (14) into the wall
4.3 Fix the wall plate (15-1) using screw (16); put the metal fixture (15-2) to cover the wall plate
   Fix the fixture (15-2) to the wall plate (15-1) from the top through the hole next to the wall plate
**Step 5**
Insert the rail (17) into the fixture (15-2), line up the holes on the rails and fixed glass panels

5.1 Position the fixing kit (18) and fix the rail (17) to the fixed panel (03), not too tight at this moment

5.2 Put the two rollers (19) into the rail, position the large filler (20) into the corner profile (21)

*** When installing the filler, ensure the opening is located at the bottom

5.3 Insert the rail (17) into the corner profile and fix it using screw M4*8 (22) from the side of the profile

---

**Step 6**

6.1 Push the side panel (23) into the wall profile

6.2 Place the other side of the side panel (23) into the corner profile (21)

6.3 Adjust the side panel and profiles to proper position; then insert the seal to fasten the glass panels to the profiles
**Step 7**

7.1 Place the glass clip(08) to fixed panel (03) mark the hole position through the top of glass clip

7.2 Remove the glass clip, drill a hole using \( \Phi 6\)mm bit; Once hole is drilled apply a small amount of silicone into the hole

*** plug(14) is not applied if install on a tray
*** plug(14) is necessary to install directly on floor

**Step 8**

8.1 Insert the small filler (10) into the corner profile (21); then position the chrome strip(09) through the strip to the corner profile

*** When installing the filler, ensure the opening is located at the bottom

8.2 Place the glass clip(08) to the fixed panel(03), then move it down and ensure the chrome strip (09) to be positioned correctly to the glass clip

8.3 Fasten the clip by screwdriver with ST4×16(07) from the top of the clip(Position A)

*** Need to drill a hole on tray/floor through Position A
Step 9
9.1 Place the door panel up to rail(17) and ensure the bottom of door panel sit on the glass clip (08); then fasten the rollers(19) to the rail
9.2 Push the door panel seal(04) to door panel
9.3 Push the fixed panel seal(04) to fixed panel and ensure the lip is towarding inside

Step 10
10.1 Insert the seal(12) into the corner profile
10.2 Fasten the handles(11) to the door panel
Step 11
Using a spirit level to check whether the door panel is installed level;
If not, please use a proper Allen Key(supplied) to adjust the roller to ensure the door panel is horizontal

Step 12
Apply silicone along the bottom outer edge of the frame and up the outer of the profiles

*** Do not apply silicone from inside
*** Do not use the enclosure for at least 24 hours to let the silicone fully cure
