Cleaning

Use only a clean damp cloth.

No abrasive cleaning agents or materials should be used.

General glass cleaner can be used for the screen, but ensure that this will not damage the chrome, check the cleaning information on the product before use.

Straight Double Bath Screen

Please retain this manual after installation for future reference and maintenance.
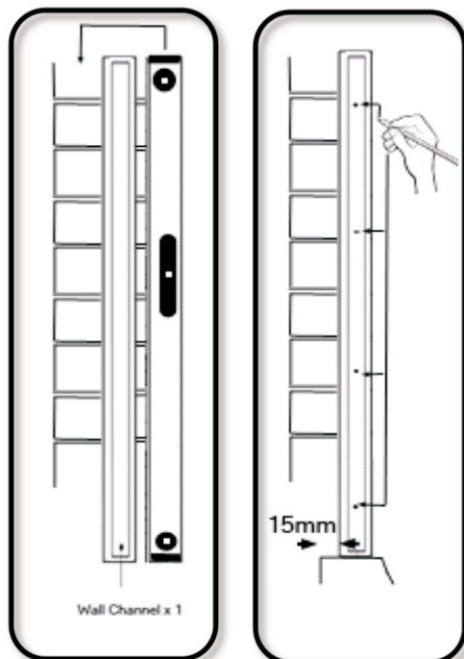

Images are for installation purposes only.

⚠ IMPORTANT

Handle with care, impact can damage both the glass and frame

Check for pipes and wires prior to drilling

Use of safety equipment is advised

Two people may be required for parts of the installation

Wall Channel x 1

Place the wall channel onto the edge of the bath
approx 15mm in from outer edge, against
the finished wall surface.

Using a spirit level check that the wall channel is
vertical on either side.

Once the position has been set, mark
the channel drill holes for drilling

15mm

Wall Plugs x 4   Large Wall Screws x 4

Wall Channel x 1

Remove the wall channel.

Drill the holes and insert the plugs, tap in so flush
with finished wall.

Place the wall channel against the wall and secure
wall channel, using the screws provided.

Sealing

Fit the rubber seal to the bottom of the
screen, ensuring it is fully pushed onto the
glass.
Seal along the side of the wall
channel, along the bottom edge of
the wall channel and around the
pivot joint.
The seal should be done on the
 outside of the screen only.
Finally, install the towel rail to the screen.

Screen

Wall
Channel

Towel Rail

Place the rail through the holes in the screen and connect fittings on opposite
side and tighten

Screw the clamp to the brace arm, place the clamp underneath the end of the arm and insert the screw through the inside of the clamp and into the arm.

Place the clamp onto the screen and position the arm against the wall and mark the position.
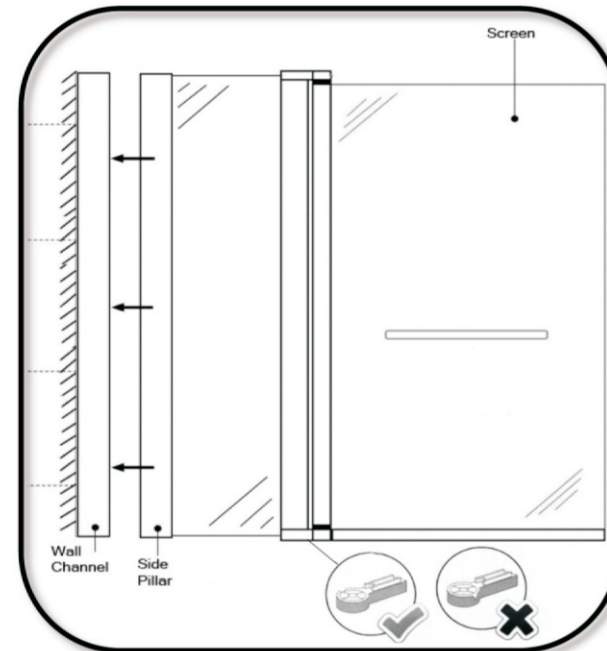

Remove the bracket from the brace arm and position this on the mark and mark the drill hole.

Drill hole and insert plug, then secure the bracket to the wall.

Insert the screen protector into the clamp, between the screen and the clamp screw.

Push the brace arm into the bracket and secure using grub screws

Tighten the clamp screw against the screen protector, do not over tighten

Push the side pillar into the fixed wall channel.

Adjust the side pillar to make the panel level above the bath

Once the level has been achieved drill through the wall channel and side pillar

ALWAYS ENSURE THE DRAINAGE SLOT IS LOCATED ON THE INSIDE OF THE SCREEN, DEPENDING ON YOUR INSTALLTAION, THIS MAY REQUIRE THE PIVOTS TO BE SWITCHED TO ALLOW THIS.

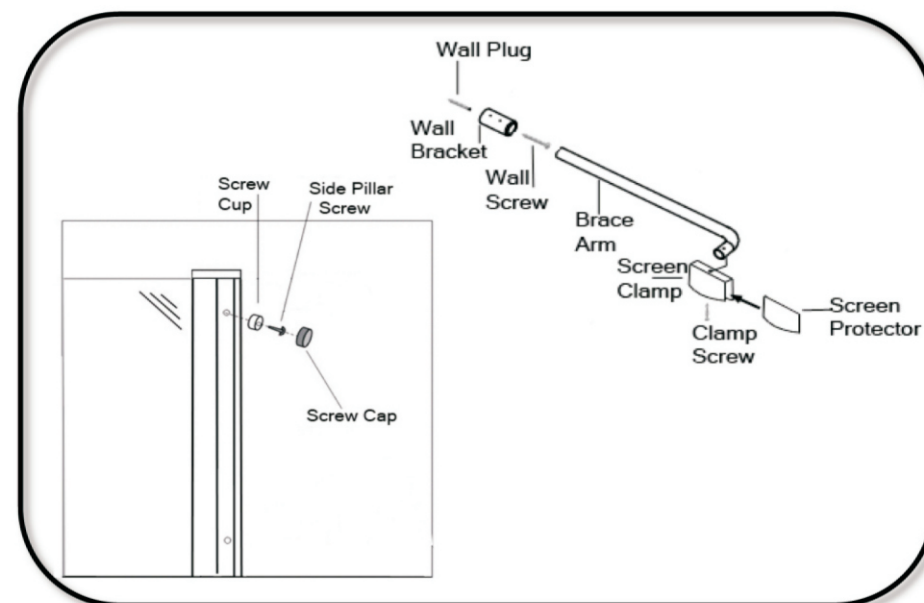

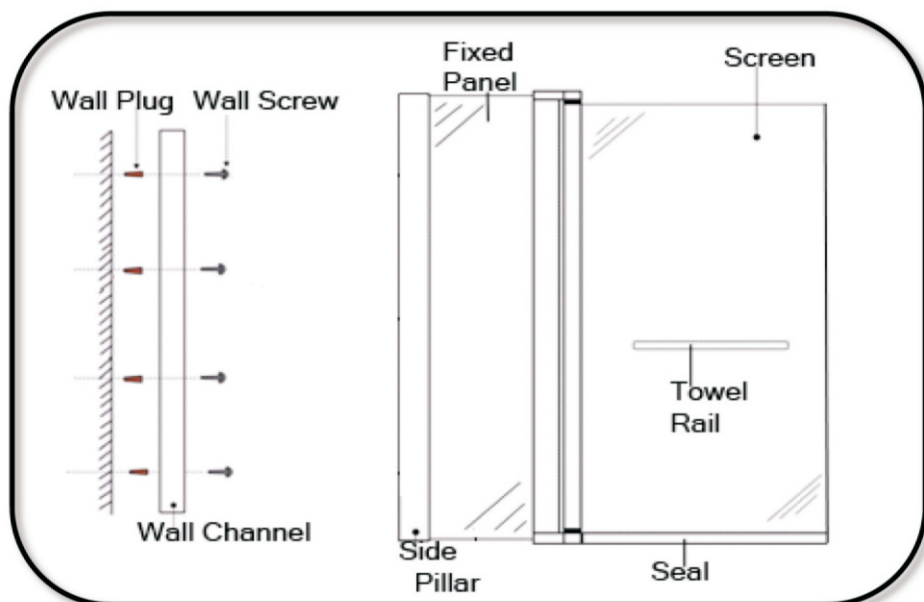

Drill through the wall channel and side pillar from inside the shower screen.

DO NOT DRILL THROUGH BOTH SIDES OF THE ASSEMBLY

Drill the top and bottom holes 100mm from each end then the remaining two holes, equally spaced.

Once drilled secure the side pillar into the wall channel using the screws provided.

Then fit screw covers

* (Only one main screen is supplied, either round or rectangular depending on the style purchased)

Guarantee

Not covered by the guarantee is:

- Breakdown due to -

  a) Use other than domestic
  b) Wilful act of neglect
  c) Any malfunction resulting from incorrect use
  d) Incorrect assembly/installation

- Repair costs for damage caused by foreign objects or substances

- Total loss of the product due to non-availability of parts

- Compensation for loss of use of the product or consequential loss of any kind.

- Call out charges where no fault has been found with the product.

- The cost of repair or replacement of any accessories installed at the same time.

- The cost of routine maintenance, adjustments, overhaul, modifications, loss or damage, arising therefrom,

  including the cost of repairing damage, breakdown, malfunction caused by incorrect use, assembly or maintenance
